(778) 714-2747

## Summary

Motivated web developer with a passion for coding and a strong foundation in web development technologies. Eager to apply my skills and expand my knowledge while contributing to web development projects.

---

## Projects

### JDesigno

[See project](#)

- Crafted a modern, 7-page website featuring 5 distinct templates with a mobile-first design approach, ensuring full responsiveness across various devices.
- Enhanced user experience by integrating interactive maps using Leaflet.js for React, enabling JDesigno customers to explore physical locations seamlessly.
- Leveraged advanced web development techniques, including conditional rendering based on URL path and interactive hover states, to create a dynamic and engaging user interface.
- Prioritized scalability and performance optimization by implementing responsive image rendering tailored to different screen sizes.
- Utilized a robust tech stack featuring ViteJS, React, React Router 6, Tailwind CSS, and Leaflet.js for a cohesive and efficient development process.

### FakeFlicks

[See project](#)

- Developed the front end of a fully responsive, multi-page web entertainment application from scratch.
- Implemented a modern user interface with interactive hover states for enhanced user experience.
- Integrated essential features, including a dynamic search function and a user-friendly bookmarking system.
- Categorized content into TV series, movies, and bookmarked for easy navigation.
- Utilized a tech stack consisting of ViteJS, React, React Router 6, and Tailwind CSS to ensure optimal performance and maintainability.

### Dream Estates

[See project](#)

- Developed a feature-rich, fully responsive, and mobile-friendly real estate web application using a modern tech stack.
- Utilized React and Chakra-ui for the frontend to ensure an intuitive and visually appealing user interface.
- Implemented Next.js for efficient routing and fetching data and images from RapidApi to populate property listings.
- Empowered users to explore available properties for sale or rent with a comprehensive set of filtering options, including criteria like price, number of rooms, and more.
- Enhanced user experience and interactivity, making it easier for users to find their ideal property.
- Ensured seamless functionality across both desktop and mobile devices.
